AVITI 24 – multiomics without limits

Workshop

Unlock high dimensional biology with 5D multiomics

Tuesday 18 November 2025
From 11:00 AM
MBC1
Aula Seminari - Via Nizza 52, Torino

Speaker:
Agnieszka Ciesielska
Senior Technical Sales Specialist Element Biosciences, EMEA Distribution

Deciphering cellular complexity and elucidating biological mechanisms demand tools that go beyond single-modality measurements.
AVITI24 is a first-of-its-kind integrated sequencing and multiomics platform that delivers simultaneous in situ transcriptomics, proteomic, and morphological profiling at single cell resolution.
AVITI24 empowers researchers to explore cell identity, signaling, and function with greater precision and scale, advancing high dimensional biology across a diverse biological systems and experimental contexts highly supporting drug screening, cell therapies as well as personalised medicine approaches.
